

EVAPORATE SLUDGE DISPOSAL COSTS

SLUDGE DRYER

The Original “Under-the-Press” Filter Cake Dryer

- Save on disposal costs with reduced sludge volume
- Reduce “potentially responsible party” landfill liability by lowering disposal weight
- Potential to concentrate metals (example: Ni/Cu) for recycling
- Reduce storage space for collected filter cake
- Available for under filter press or standalone installations

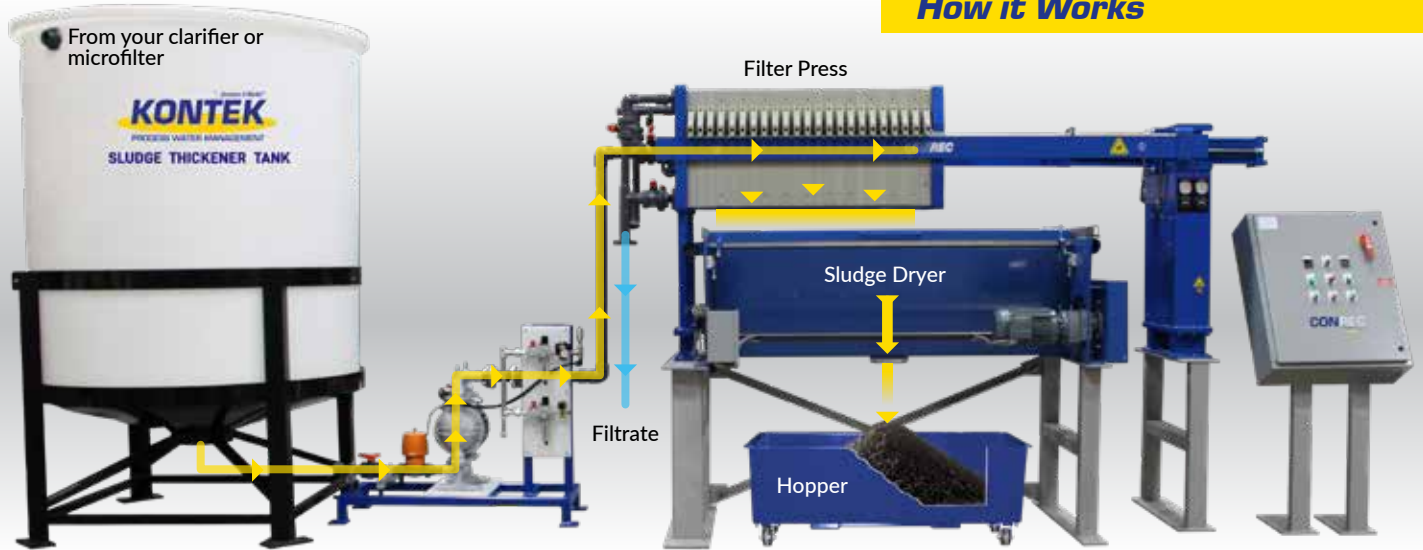

CONREC Sludge Dryer installed directly under CONREC Filter Press

CONREC Sludge Dryers are the Original Under-the-Press Filter Cake Dryer

CONREC sludge dryers can be custom fabricated to fit under most existing filter press units. Standard sizes are available fitted perfectly when purchased to pair under a CONREC filter press. When installed under a filter press, the filter cake falls directly into the sludge dryer limiting personnel exposure to potentially hazardous waste. The sludge dryer can then drop dried filter cake directly into a super sack, hopper or drum.

REDUCE Filter Cake Disposal Costs

Return on Investment as quickly as 10 months*

Disposal costs continue to rise. Now is the time to invest in a sludge dryer to lower your overall sludge disposal costs. In some cases, it's possible to eliminate disposal costs when metal content is concentrated through this dewatering process and sell the recovered metal as recycling.
